## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-12, 14-24 and 26-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipated nor rendered obvious that a liquid crystal display device comprises various elements as claimed, more specifically, as the following features:

the pixel electrode made of an amorphous transparent conductive film of sufficient thickness (approximately 500 Å to 2000 Å) to prevent a generation of a galvanic effect [claims 1,8 and 17 as shown in Fig.3D];

the pixel electrode made of a polycrystalline transparent conductive film of sufficient thickness to prevent a generation of a galvanic effect by a stripper [claims 26, 27 and 28 as shown in Fig.3D].

The prior art of reference such as Jeong disclose that using ITO layer having thickness of 300-2000 Å to form the pixel electrode, but the prior art of references do not show that using an amorphous transparent conductive film or a polycrystalline transparent conductive film to form pixel electrode having sufficient thickness such as 500 Å to 2000 Å so as to prevent a generation of a galvanic effect caused by the stripper as claimed in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Qi whose telephone number is (571) 272-2299. The examiner can normally be reached on M-T 8:00 am-5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
